

Lab 05 – GitHub practices

This lab explores the repository hosting platform called **GitHub**. You will work with some typical practices used in this platform.

- Get started using GitHub;
- Be able to collaborate and work together on GitHub;
- Learn why conflicts happen and how to resolve them.

For this lab, you will do three of the GitHub Skills labs available at:

<https://skills.github.com/>

Introduction to GitHub

Perform the activities in the *Introduction to GitHub* tutorial at:

<https://github.com/skills/introduction-to-github>

Review pull requests

Perform the activities in the *Review pull requests* tutorial at:

<https://github.com/skills/review-pull-requests>

Resolve merge conflicts

Perform the activities in the *Resolve merge conflicts* tutorial at:

<https://github.com/skills/resolve-merge-conflicts>

Submit your results

Submit the results of your tutorials by sending the links to all three (public) repositories you created in these learning tutorials (see below). That is how you will be assessed in this lab.

To submit the links, send them in text format to the BrightSpace Assignments page (choose Lab 5). Remember to click submit afterward. You should receive a notification that your text with the links was successfully submitted.
